Business at OECD responds to G7 Statement on Global Minimum Tax

Paris, 3 July 2025 – *Business at OECD* (BIAC) welcomes the G7 statement on a proposed path forward for advancing the global minimum tax alongside the U.S. tax system, with shared goals to address base erosion and profit shifting. In this context *Business at OECD* underlines the role of the OECD/G20 Inclusive Framework as the forum to preserve international co-operation among sovereign nations to enhance tax policy certainty, mitigate the risk of double taxation, stabilize tax systems and promote a level playing field. "Avoiding U.S. retaliatory measures and going for further simplification of the GLoBE rules are what global business needs", says *Business at OECD's* Tax Committee Co-Chair Christian Kaeser.

Business at OECD continues to advocate for administrability and simplification in the implementation of Pillar 2 and stands ready to support the OECD in identifying practical measures, including a permanent safe harbor, to deliver on the promise of simplifying the GLoBE rules towards a sound, globally accepted approach that seeks to foster cross border trade and investment, growth and innovation. As noted by Daniel Smith, *Business at OECD's* Tax Committee Co-Chair, "As has been the case in past years, the *Business at OECD* Tax Committee, has aimed to constructively provide technical expertise, share business insights, and work towards practical solutions to tax policy issues, and *Business at OECD* will similarly strive to assist in realizing the goals of this agreement around simplifications, treatment of credits, and stable policy."
